Sequence 15, Application US/0980503

Patent No. US20020131964a1

GENERAL INFORMATION:
GENERAL INFORMATION:
FILLE OF INVENTION: COMPOSITIONS AND METHODS FOR MODULATING MUSCLE CELL AND TITLE OF INVENTION: TISSUE CONTRACTABILITY
FILLE REFERENCE: 9596-331

CURRENT APPLICATION NUMBER: US/09/880,503

CURRENT FILING DATE: 2001-06-13

Sequence 122, Application US/09850716A

Patent No. US20020115139A1

GREREAL INFORMATION:

APPLICANT: Kalos, Michael D.

APPLICANT: Reter, Marc W.

TITLE OF INVENTION: COMPOSITIONS AND METHODS FOR THE THERAPY

TITLE OF INVENTION: AND DIAGNOSIS OF LUNG CANCER

TITLE OF INVENTION: AND DIAGNOSIS OF LUNG CANCER

TITLE OF INVENTION: AND DIAGNOSIS OF LUNG CANCER

CURRENT PRILIG DATE: 2001-05-07

NUMBER OF SEQ ID NOS: 440

SOFTWARE: PastSEQ for Windows Version 3.0

SEQ ID NO 122

LENGTH: 1475
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                DB 10; Length 1475;
